Red Meat Production April Milk Production Cattle on Feed Cattle County Estimates Potato Stocks April Farm Labor April Egg Production

April 2008 Red Meat Production

Montana slaughter plants produced 0.9 million pounds, dressed weight, of red meat during April 2008, down 14 percent from April 2007 and 23 percent from March 2008. Cattle slaughter totaled 1,100 head, 200 head below one year ago. The average live weight, at 1,163 pounds, decreased 23 pounds from last year.

During April, Montana plants slaughtered 700 hogs, down 100 head from a year ago. The average live weight, at 263 pounds, was up 16 pounds from last year. April sheep slaughter in the state totaled 200 head, up 100 head from April 2007. The average live weight increased 9 pounds to 101 pounds.

Commercial red meat production for the United States totaled 4.30 billion pounds in April, up 14 percent from the 3.75 billion pounds produced in April 2007

Beef production, at 2.25 billion pounds, was 12 percent above the previous year. Cattle slaughter totaled 2.96 million head, up 10 percent from April 2007. The average live weight was up 24 pounds from the previous year, at 1,259 pounds.

Veal production totaled 11.9 million pounds, 1 percent above April a year ago. Calf slaughter totaled 73,300 head, up 29 percent from April 2007. The average live weight was down 70 pounds from last year, at 278 pounds.

Pork production totaled 2.02 billion pounds, up 18 percent from the previous year. Hog kill totaled 9.99 million head, up 18 percent from April

2007. The average live weight was down 1 pound from the previous year, at 269 pounds.

Lamb and mutton production, at 15.3 million pounds, was up 2 percent from April 2007. Sheep slaughter totaled 221,400 head, 2 percent above last year. The average live weight was 138 pounds, unchanged from April a year ago.

January to April 2008 commercial red meat production was 16.8 billion pounds, up 8 percent from 2007. Accumulated beef production was up 5 percent from last year, veal was down 12 percent, pork was up 13 percent from last year, and lamb and mutton production was down 5 percent.

April U.S. Milk Production up 2.5 Percent

Milk production in the 23 major States during April totaled 14.8 billion pounds, up 2.5 percent from April 2007. March revised production at 15.1 billion pounds, was up 2.3 percent from March 2007. The March revision represented a decrease of 10 million pounds or 0.1 percent from last month's preliminary production estimate.

Production per cow in the 23 major States averaged 1,757 pounds for April, 12 pounds above April 2007.

The number of milk cows on farms in the 23 major States was 8.44 million head, 152,000 head more than April 2007, and 8,000 head more than March 2008.

U.S. Cattle on Feed Down 1 Percent

Cattle and calves on feed for slaughter market in the United States for feedlots with capacity of 1,000 or more head totaled 11.1 million head on May 1, 2008. The inventory was 1 percent below May 1, 2007 and 4 percent below May 1, 2006.

Placements in feedlots during April totaled 1.54 million, 2 percent below

Issue: 08-10 Released: May 23, 2008

2007 and 5 percent below 2006. Net placements were 1.46 million head. During April, placements of cattle and calves weighing less than 600 pounds were 315,000, 600-699 pounds were 278,000, 700-799 pounds were 428,000, and 800 pounds and greater were 515,000.

Marketings of fed cattle during April totaled 2.01 million, 11 percent above 2007 and 13 percent above 2006. This is the highest fed cattle marketings for the month of April since the series began in 1996.

Other disappearance totaled 75,000 during April, 24 percent below 2007 and 14 percent below 2006.

U.S. May Potato Stocks

The 13 major potato States held 92.7 million cwt of potatoes in storage May 1, 2008, up 17 percent from a year ago and 22 percent above May 1, 2006. Potatoes in storage accounted for 23 percent of the 2007 fall storage States' production, up 3 percentage points from last year. Klamath Basin stocks totaled 570 thousand cwt on May 1, 2008, down 5 percent from last year. Klamath Basin stocks include potatoes stored in California and Klamath County, Oregon. Disappearance from the start of harvest to May 1 was at 307 million cwt, 1 percent below last year but up 3 percent from 2006. Shrink and loss, at 23.4 million cwt, was down 3 percent from the same period in 2007 but up 6 percent from 2006. Processors have used 158 million cwt of the 2007 potato crop so far this season, down 3 percent from last year's season-to-date usage but up 6 percent from 2 years Idaho and Malheur County, Oregon total processing decreased 1 percent from a year ago and Maine's total processing was 3 percent below Washington and the rest of Oregon total processing was 4 percent lower than last season. Dehydrating usage accounted for 33.4 million cwt of the total processing, down 8 percent from last year but 11 percent above the same period in 2006.

U.S. Hired Workers Down 7 Percent, Wage Rates Up 4 Percent From a Year Ago

There were 919,000 hired workers on the Nation's farms and ranches during the week of April 6-12, 2008, down 7 percent from a year ago. Of these hired workers, 700,000 workers were hired directly by farm operators. Agricultural service employees on farms and ranches made up the remaining 219,000 workers.

Farm operators paid their hired workers an average wage of \$10.60 per hour during the April 2008 reference week, up 40 cents from a year earlier. Field workers received an average of \$9.65 per hour, up 30 cents from last April, while livestock workers earned \$10.32 per hour compared with \$9.59 a year earlier. The field and livestock worker combined wage rate, at \$9.87 per hour, was up 45 cents from last year.

The number of hours worked averaged 41.0 hours for hired workers during the survey week, up 1 percent from a year ago.

The largest decreases in the number of hired workers from last year occurred in California and in the Delta Louisiana, (Arkansas, and Mississippi), Southeast (Alabama, Georgia, and South Carolina), Mountain I (Idaho, Montana, and Wyoming), and Southern Plains (Oklahoma and Texas) regions. In California, planted acreage of cotton, dry beans, and sugar beets declined sharply from 2007. Therefore, the demand for field workers was considerably lower. Excessive rain and flooding in the Delta region curtailed most field activities and lessened the need for field workers. In the Southeast region, wet conditions and low soil temperatures delayed

corn and cotton planting in Alabama and Georgia, reducing the demand for field workers. Snow and cold temperatures across most of the Mountain I region halted planting activity until late in the week, and calving and lambing were behind normal. These factors led to reduced demand for field and livestock workers. In the Southern Plains region, heavy rains in Oklahoma more than offset the drier conditions in Texas and delayed planting of row crops, resulting in fewer hired workers.

The largest increases in the number of hired workers from last year occurred in the Appalachian I (North Carolina Virginia), Appalachian and (Kentucky, Tennessee, and West Virginia), Northeast I (New England and New York), Pacific (Oregon and Washington), and Northern Plains (Kansas, Nebraska, North Dakota, and South Dakota) regions. Strong demand from poultry operations and from the nursery and greenhouse industries in the Appalachian I region caused hired worker numbers to be higher. In the Appalachian II region, strong demand from the equine and cattle industries led to an increase in hired workers. Last year's reference week weather in the Northeast I region was plagued by frigid temperatures and snow. A return to more normal weather patterns this year resulted in a greater need for hired workers. In the Pacific region, increased demand from fruit growers and from the nursery and greenhouse industries kept worker numbers above the previous year. Heavy snow in parts of the Northern Plains region caused livestock stress which led to more supplemental feeding and increased the need for hired workers.

Hired worker wage rates were generally above a year ago in most regions. The largest increases occurred in the Mountain III (Arizona and New Mexico), Corn Belt I (Illinois, Indiana, and Ohio), Corn Belt II (Iowa and Missouri), Southeast and Appalachian I regions. Mountain III and Corn Belt I regions, the higher wages were due to a larger proportion of salaried workers putting in fewer hours, which pushed the average hourly wage higher. wage increase in the Corn Belt II region was due to a smaller percentage of part time workers. In the Southeast and Appalachian I regions, the higher wages resulted from a higher proportion of nursery and greenhouse workers. (See table on back page)

U.S. April Egg Production Down 1 Percent

U.S. egg production totaled 7.38 billion during April 2008, down 1 percent from last year. Production included 6.28 billion table eggs, and 1.11 billion hatching eggs, of which 1.04 billion were broiler-type and 66 million were egg-type. The total number of layers during April 2008 averaged 341 million, down 1 percent from last year. April egg production per 100 layers was 2,164 eggs, up slightly from April 2007.

All layers in the U.S. on May 1, 2008 totaled 341 million, down 1 percent from last year. The 341 million layers consisted of 280 million layers producing table or market type eggs, 57.7 million layers producing broiler-type hatching eggs, and 2.84 million layers producing egg-type hatching eggs. Rate of lay per day on May 1, 2008, averaged 71.8 eggs per 100 layers, up 1 percent from May 1, 2007.
